DIRTBYE

Cleaning tool for lids, grooves and threads

commonly found on **baby goods**, airtight containers, water bottles and other daily supplies

**BPA Free & made from
Environmentally friendly material**

**Destroy viruses and saprogenic bacteria
Guard your family's health**

Be used
separately

Made of **Coffee Powder**

Dirt Bye easily removes the seal from airtight container lids and completely cleans dirt, stains and any other particles in the groove and on other surfaces.

Features

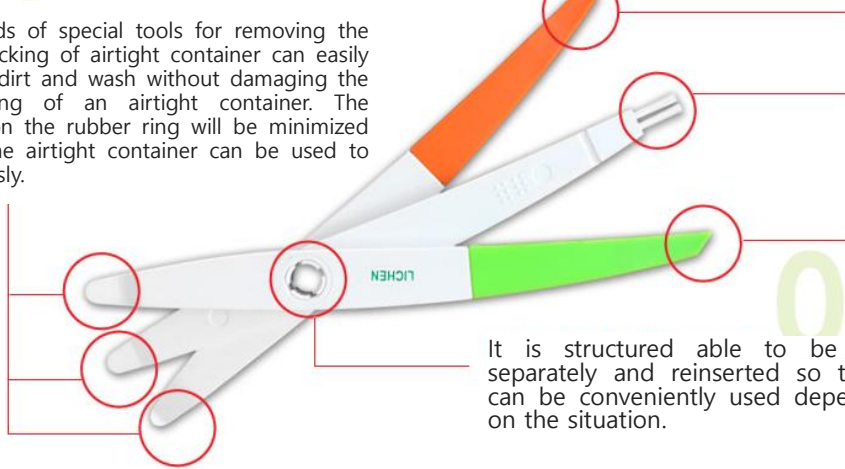

01

Three kinds of special tools for removing the rubber packing of airtight container can easily eliminate dirt and wash without damaging the rubber ring of an airtight container. The damage on the rubber ring will be minimized so that the airtight container can be used continuously.

02

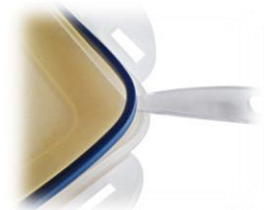

The stubborn dirt in airtight container, baby bottles, children's trays hardly reachable by various cleaning sponges can be easily eliminated with flowing water by using 2 pieces of TPE and a pointed brush.

TPE: Thermoplastic Elastomer similar to silicone, but more stable against bacteria

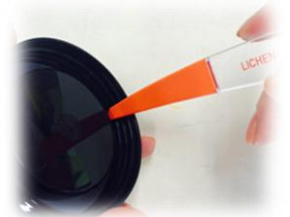

It is structured able to be used separately and reinserted so that it can be conveniently used depending on the situation.

03

Airtight container

Tumbler

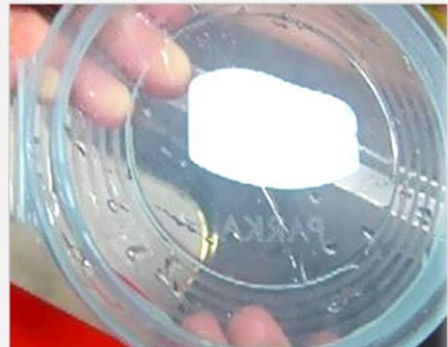

Cleaning

Completely removing stubborn dirt!

Including brushes!

The cleaning part with a brush will completely eliminate stubborn dirt stuck in grooves and crevices. Please wash the part, where a scrubbing brush does not fit into, with flowing water after inserting DIRT BYE.

After cleaning
